PROFESSIONAL PROFILE

Career-transition professional focused on Data Analysis, currently pursuing a degree in Systems Analysis and Development at UNINTER and trained in Data Analytics through TripleTen. Hands-on project experience with Python, SQL, Pandas, NumPy, Matplotlib, Tableau and Power BI, applying data cleaning and transformation, exploratory analysis, visualization, statistical testing, A/B testing, funnel analysis and business metrics. Seeking a Junior Data Analyst opportunity to turn data into clear analyses, identify improvement opportunities and support business decisions.

PROFESSIONAL EXPERIENCE

Production Operator - Yazaki do Brasil LTDA | Sep 2024 - Present

Experience in an industrial environment, strengthening discipline, process awareness, quality focus, organization and teamwork.

App Driver | 2019 - 2024

Independent customer-service work requiring autonomy, time management, route planning and day-to-day decision-making.

TECHNICAL PROJECTS

Funnel Analysis and A/A/B Test | Python | Pandas | Statistics

- Analyzed 240,887 events from 7,534 users and mapped the Main → Offers → Cart → Payment funnel, with an overall conversion rate of 47.7%.
- Ran 20 A/A and A/B statistical tests using an adjusted significance level of 0.0025; no statistically significant difference was found between the groups.

Operator Efficiency Dashboard - CallMeMaybe | Tableau | KPIs | Data Visualization

- Analyzed operational indicators to compare operator performance and support the identification of potential inefficiencies.
- Built an interactive Tableau Public dashboard with filters and KPIs for ongoing operational monitoring.

Vehicle Ads Web Dashboard - NewApp | Python | Pandas | Plotly | Streamlit

- Built an interactive web application to explore vehicle-ad data, including mileage distributions and mileage-versus-price relationships.
- Published the application on the web and versioned the source code with Git/GitHub.

TECHNICAL SKILLS

- **Python:** Pandas, NumPy, data cleaning, transformation and EDA.
- **SQL & Databases:** PostgreSQL, MySQL, JOINS, aggregations, GROUP BY and subqueries.
- **Business Intelligence:** Tableau, Power BI, KPIs and dashboard development.
- **Visualization:** Matplotlib, Plotly, Dash and Streamlit.
- **Statistics & Experimentation:** hypothesis testing, A/B testing and funnel analysis.
- **Machine Learning:** scikit-learn for regression, classification and clustering.
- **Business Metrics:** CAC, LTV, ROMI, DAU, WAU and MAU.
- **Tools:** Jupyter Notebook, Git, GitHub and Apache Spark.

EDUCATION

Systems Analysis and Development - UNINTER (Distance Learning) | Expected completion: Feb 2027

Data Analyst Program - TripleTen (Online) | Feb 2026 - Sep 2026
